garvit-sahni

SUMMARY

Computer Science (AI & ML) student with hands-on experience across backend systems, AI-powered applications, and workflow automation. Built an institutional complaint management system at DRDO and contributed full-stack to an AI-assisted HR screening platform at IHMCL, working with Node.js, FastAPI, React, and NLP/LLM-based pipelines. Strong interest in backend engineering, AI-enabled products, and applying research to real-world systems.

EXPERIENCE

Indian Highways Management Company Limited (IHMCL)

New Delhi, India

Software Development Intern (Full-Stack)

1 June 2026 – 31 July 2026

- Contributed as a full-stack developer to **AutoRecruit-Validator**, an AI-assisted HR recruitment screening platform used to automate candidate eligibility screening.
- Worked across the stack – React/Vite/React Query on the frontend and FastAPI/PostgreSQL/SQLAlchemy on the backend – to support the end-to-end recruitment workflow.
- Helped integrate Google Gemini for structured job-description parsing and criterion-based candidate evaluation.

Defence Research & Development Organisation (DRDO – CFEEs)

New Delhi, India

Intern

23 June 2025 – 23 July 2025

- Developed an AI-driven complaint registration chatbot to automate institutional grievance workflows.
- Designed structured conversation flows for Computer, Network, and Telecom complaint categories.
- Built a Node.js backend and admin dashboard for complaint management and status tracking.

BillionBrains Consolation Pvt. Ltd.

Freelance

Freelance Web Developer

- Designed and developed the company website for BillionBrains Consolation Pvt. Ltd.
- Built a responsive, cross-device front end using HTML, CSS, and JavaScript.

PROJECTS

AI Complaint Chatbot

Node.js, NLP, REST APIs

- Built a full-stack complaint system with chatbot UI and admin dashboard.
- Designed a structured workflow engine handling Computer, Network, and Telecom complaints.
- Implemented real-time complaint tracking and status updates (Pending / Resolved).

Medix — Healthcare Assistance Platform

Node.js, HTML, CSS, JavaScript

- Developed a web-based healthcare assistance system for guiding users to appropriate medical services.
- Built a symptom-based input system that suggests relevant departments.
- Designed a responsive UI for accessibility across devices.

NeuroPave — AI-Based Road Damage Detection System

Python, ML, Computer Vision, Node.js

- Developed an AI-powered infrastructure monitoring system for detecting and analyzing road surface damage.
- Designed image-processing and ML workflows to identify potholes, cracks, and road anomalies.
- Built a scalable backend architecture for processing reports and managing inspection data.

GreenRoute AI — Smart Route Optimization System

Python, ML, Graph Algorithms

- Developed an AI-based route optimization system to identify fuel-efficient and time-saving routes.
- Implemented graph-based algorithms (shortest-path logic) combined with traffic-aware heuristics.
- Designed system to reduce travel cost and carbon emissions through optimized path selection.

EDUCATION

Dronacharya College of Engineering, Gurugram

2024 – Present

B.Tech Computer Science (AI & ML)

Relevant Coursework: Machine Learning, Data Structures & Algorithms, Database Management Systems, Natural Language Processing, Object-Oriented Programming

Delhi Public School Ghaziabad, Gurugram

2009 – 2024

XII (CBSE) PCM – 78%

X (CBSE) – 78%

SKILLS

Languages	Python, Java, C++, JavaScript, R
Web & Backend	Node.js, Express.js, FastAPI, React, HTML, CSS
AI / ML	NLP, LLM Integration (Gemini), Chatbot Development, Fraud Detection, Supervised Learning
Core CS	Data Structures & Algorithms, DBMS, Object-Oriented Programming
Tools	Git, GitHub, VS Code, PostgreSQL

ACHIEVEMENTS

- Competed in NexHack (national-level hackathon) — built a working prototype addressing fintech.
- Participated in 7+ hackathons.
- Presented research paper “The Cosmic Sponge: A New Paradigm for Describing Dark Matter and Cosmic Structure” at IEEE IGNITE-2026, Pune, and at PG-DAV College and Shyam Lal College, University of Delhi.
